Premium quality fencing systems

Post and Rail / Electric Fencing / Aluminium Gates

## Introducing Ecoline's new and innovative Co-Extruded Rural Fencing Systems... available in a variety of configurations to suite your needs.

Ecoline fencing systems are manufactured using the very best materials and are specifically designed to replace traditional fencing systems. Ecoline's rural fencing systems are available for our unique Australian conditions.

Our Fencing Products are:

- UV Resistant
- Guaranteed to never Peel, Blister, Rot or Rust
- Immune to Moisture and Termites
- Maintenance Free, No Painting ever required
- Quick and Hassle free assembly
- 100% Recyclable

Ecoline's rural fencing and gate systems are available in a variety of colours.

\*\* we endeavor to represent colours as accurately as possible however no guarantees can be given.

### Engineering behind Ecoline

All Ecoline products are co-extruded from 100% virgin materials; co-extrusion is the latest technology used for moulding PVC and ASA profiles. Typically two layers are produced: the outer layer is specially constructed with a denser concentration of materials, thus making it harder and providing greater protection against harsh UV rays. The inner layer is manufactured in much the same way however less UV inhibitors are utilised as the emphasis is on producing a stronger molecular bond.

As a result of using co-extrusion, our products are designed with a denser outer layer to protect against harmful UV rays and a more flexible inner layer which is specifically designed to withstand impact.

Ecoline colour profiles are co-extruded using ASA resin which produces a product with both a high temperature endurance and high gloss properties.

### Ecoline Quality Control & Testing

Ecoline products undergo vigorous quality checks throughout the manufacturing process to ensure you, the consumer, is provided with a product of the up most quality. Strict testing of the inhibitors used during the production process is conducted so that our products aren't chalky nor discolour due to UV rays.

Ecoline fence posts are constructed using 6mm thick walls, higher than the average manufacturer, this helps our products withstand the vigorous high impact and UV tests that are conducted to ensure our fencing systems meet our premium quality standards.

latest Co-Extrusion formulae and are main focus is to provide the best possible

range of colours and designs.

accurately as possible  
be made.

Product Benefits	Ecoline
Never requires painting	✓
Impervious to Termites	✓
Will never Peel, Splinter or Chip	✓
Fungus and Dry Rot Free	✓
Lead Free	✓
Environmentally Friendly	✓
Outer layer Co-Extrusion with ASA	✓
Inner-core manufactured using PVC	✓
Inner layer designed to withstand impact	✓
Dense outer layer to protect against UV rays	✓
High quality virgin materials	✓
Hassle free installation	✓
Long Life Warranty	✓
Wide range of colours	✓

## FAQs

### Can my PVC/ASA fence break?

As with all fencing products, Vinyl fencing can break if subjected to high stress by a direct impact. Under normal use, the fence will not break and when required, planks, pickets and rails are easily replaced.

### Do PVC/ASA fences expand?

It is normal for vinyl materials to expand and contract during extreme temperature changes however your supplier will allow for expansion and contraction during the installation process.

### Will my PVC/ASA fence chip, peel or splinter?

All Ecoline fences are produced with a denser outer layer ensuring you never have to worry about the surface of your fence chipping, peeling or splintering.

### What is the expected life span of a PVC/ASA fence?

Our fencing systems are all designed using the very best materials ensuring your product lasts as long as possible, to prove this all our fences are backed by Ecoline's long life warranty.

### Are PVC/ASA fences really maintenance free?

Ecoline fencing systems are co-extruded to ensure the outer layer is vastly denser than the average fence, thus it is far more resilient to normal wear and tear experienced by other products.

### How do you clean a PVC/ASA fence?

As is the case with all outdoor products, fences and railing will become dirty when exposed to the elements. Keeping your fence clean is as simple as using a detergent and water solution to wipe away any dirt.

# Post & Rail Fencing

**Single Rail**  
2.1m posts with 2.4m spacings

**2 Rail**  
2.1m posts with 2.4m spacings

**3 Rail**  
2.1m posts with 2.4m spacings

Ecoline's Post and Rail Fencing systems are entirely customizable and can be altered to suite your individual needs, they come with a standard post of 5" x 5" and your choice of either single, 2, 3 or 4 rail system; configurations may be altered upon request.

Ecoline fences work perfectly in conjunction with ElectroBraid™ electric fencing; no additional insulators are required when running the electric rope directly through our posts.

Available in a range of colours and compatible with all our accessories, speak to your local Ecoline distributor to develop a solution for your needs.

## Beautiful designs providing Safety and Security for your precious livestock

Ecoline's range of Post and Rail fencing systems are the perfect solution for all your horse and livestock requirements. Our PVC fences are co-extruded using ASA resin to provide you with a fence that has superior durability and impact resistance compared to traditional fencing materials.

Our fencing systems are the safest possible for your horses and livestock; unlike wood which splinters and leaves jagged edges that could harm your livestock.

Hassle free installation with the use of notched rails, removing the need for nails and screws.

Rails are centred on the posts so that our fencing systems are aesthetically beautiful from all angles.

Co-extruded to be UV resistant, providing you with a long lasting colour stable product.

Perfect for creating long lasting enclosures for your horses and livestock as well as a surreal perimeter for your property.

### 4 Rail

2.1m posts with 2.4m spacings

- ✓ **Horse Friendly**
- ✓ **ElectroBraid™ Compatible**
- ✓ **Livestock Safe**
- ✓ **Colour Stable**
- ✓ **Fungus & Dry Rot Free**

# Electric Fencing

The Safe, Secure, Permanent Electric Fence invented out of love for horses

Ecoline utilises ElectroBraid™ for all our electric fencing needs.

ElectroBraid™ is an easy to install electric fencing system designed to provide you with a safe and secure equine fence.

Its strength and durability make it the perfect solution for all your horse, sheep and livestock needs.

ElectroBraid™ is recommended by equine vets.

Resilient when struck by a panicked horse, similar to ropes in a boxing ring.

ElectroBraid™ is constructed from polyester fibres that meets the high standards established for seat belts and parachute harnesses.

Works in conjunction with Ecoline Post and Rail systems without any need for additional insulators.

## ElectroBraid™ Fence Components

- ✓ **Quick and Easy to Install**
- ✓ **Low Maintenance**
- ✓ **1300 pounds to break**
- ✓ **Braided Construction**
- ✓ **Copper Conductors**
- ✓ **25yr ElectroBraid™ Warranty**

# Gates & Hardware

Ecoline offers a wide variety of powder coated Aluminium gates.

Our gates have been specially designed to be lightweight & strong, made from suitable grade aluminium profile with stainless steel hardware. All Ecoline's gate posts are reinforced with aluminium inserts which help to strengthen the gates structural integrity.

Built to the length and standards required for each individual job, Ecoline's gates are the perfect accompaniment to your Ecoline fencing system.

In conjunction with our gates we utilise top quality hardware extruded using Ecoline's very own die's.
